

Add new word tile

Step-by-step instructions for Add new word tile in Express Me.

Watch the video, follow the steps, or open the complete transcript for a text version of the instructions.

Step-by-step instructions

1

Open the edit mode

Tap the profile icon in the top right and choose **Start editing**.

2

Choose the type

Tap **Add new tile** at the bottom and choose **Word**.

3

Name the tile

Enter the tile name under **Name**, for example **Water bottle**.

4

Choose an image

Choose **Choose from internet**, search for an image and tap it.

5

Set the position

Drag the tile to the place you want and tap **Confirm position**.

Hello, I'm going to show you how to add a new word tile to the app. First we go to edit mode. We do that by clicking on the profile icon at the top right, then start editing, and then at the bottom we see add new tile.

If we click on that, we get the different options. We'll first add a word tile, so we click on that. Then you see a name for this tile. We can make a simple one, namely a water bottle.

And then we can optionally define a sentence here that is spoken the moment we click on the tile, or we can record speech ourselves. For now we'll just create the tile. Then we can choose here how we want to add an image.

We can take a photo ourselves, choose from our gallery, or choose an image from the internet, or for now choose not to configure an image. I'm currently choosing to choose from the internet. Then we get a pop-up here and we can choose what we think is a good image.

We can also click next, and then we see a very clear image of a water bottle. Then we can determine the position here: we can move back and forth and then say confirm position. And when we close the edit mode, we've actually already added a water bottle right away.
