

Create video tile

Step-by-step instructions for Create video tile in Express Me.

Watch the video, follow the steps, or open the complete transcript for a text version of the instructions.

Step-by-step instructions

1

Open the edit mode

Tap the profile icon in the top right and choose **Start editing**.

2

Create the video tile

Tap **Add new tile**, choose **Video** and enter a name, for example **Glass of water**.

3

Record a video

Tap **Create tile** and choose **Record a video**; record the video and confirm it.

4

Wait for processing

The video is processed in the background; you can continue in the meantime.

5

Test the tile

Leave the edit mode and tap the tile to play the video.

Hello, I'm going to show you how to create a video tile. We do that by clicking on the profile picture at the top right, so we can go to the edit mode. Click on start editing, and then at the bottom we have the add new tile button again. Then we see four options, and one of them is the video tile.

If we click on that, we can give it a name here. Let's do glass with water. And then we can create the tile, and then we can choose to record a video or choose from the gallery. I'm going to record a video. There's a glass of water to my right.

We can do it like this, then we see that it's a video. And then we can basically say right away: okay, this is good. What happens then is that the video gets uploaded. It gets processed in the background. This can take a while.

In any case, it's now uploaded. Then it still gets processed in the background, again to make sure it can play on every device. That takes a moment, and then we can exit the edit mode. If all goes well, we can now click on glass with water.

We can do it like this. Then we can also talk with it ourselves. So indeed, the video is recorded right away.
