Hello, I'm going to show you how to change the image of a tile. We'll first go to edit mode, because we want to change the image of taxi. We'll first click on the blue icon at the top right.

Then we'll go to start editing. And then we can click on the three dots that appeared at the top right by the taxi tile. Then we actually see here everything we can adjust. If we scroll down a bit, you'll see the different things we can do.

We can make an image ourselves with our camera. We can choose from our gallery. We can choose something from the internet, or we can choose not to configure an image. Let's now go for choosing from the internet.

If we click on that, we indeed see some better images of a taxi. In this case I'll go for the image at the top right. We see here that the image has indeed been changed.

The only thing we still need to do is click on save. Then we can exit edit mode again. And then we indeed see that the image of taxi has been changed.
