

Move tile to another category

Step-by-step instructions for Move tile to another category in Express Me.

Watch the video, follow the steps, or open the complete transcript for a text version of the instructions.

Step-by-step instructions

1

Open the edit mode

Tap the profile icon in the top right and choose **Start editing**.

2

Open the tile

Tap the three dots on the tile you want to move.

3

Choose move

Scroll to **Move to different category** and tap it.

4

Choose the category

Navigate to the category the tile should move to.

5

Confirm

Tap **Move to this category**; the tile is now in the new category.

Hello, I'm going to show how to move a tile to another category. Let's say we want to move taxi to staff.

What we'll do then is go to edit mode. We do that by clicking the blue icon at the top right.

Then click start editing. And then we go to the three dots that appeared on the taxi tile. If we scroll down a little, we see move to another category here.

If we click that, we get the following screen. We can then simply navigate to staff. And then we can say here: move taxi to this category.

What we see is that taxi has indeed moved to this category.
