I'm going to show you how to change the voice that is used to speak the tiles in the app.

To do this, click on the settings icon in the top right of the app. You'll then enter the settings menu where you see a list of available voices.

Here you can choose from different voices, such as female and male voices. You can try out different options by clicking on them - the voice will introduce itself so you can hear how it sounds.

Once you're satisfied with your choice, click 'back' in the top right to return to the main screen. From that moment on, all tiles will be spoken in the voice you have chosen.
