Hi, I'm going to show how you can set a word tile to enlarge at the moment that you click on it.

Right now, when I click on it, it's only spoken. Yes.

But we can also go to the settings by clicking on the blue figure at the top right, then to app settings. If we scroll down a little bit, you see here: enlarge image when touched.

When we turn that on and then go back by clicking the X at the top right, we can now tap on yes. Yes.

And then you see that the tile is enlarged. This makes it easier to actually physically show the word you want to show to the person you're communicating with.
